

SPINNERS – PROP GUARD

PROP GUARD FOR 2 OR 3 BLADE PROPELLER

Anti-abrasion boot for your metal propeller. It is more economical to protect your propeller blades with PROP GUARD than to continually file, dress, paint and balance your blades until they have to be replaced. Water, sand, rock, and airborne abrasives are constantly eroding your propeller. As the name suggests, this product can eliminate this destructive process. Virtually all propeller blade failures start as leading edge nicks. PROP GUARD is a 0.018" thick clear anti-abrasion boot that is bonded to the leading edge of the propeller. PROP GUARD is made from a special high strength heat processed polymer engineered for centrifugal loads. It is NOT just a piece of tape! Easy to install (approximately 20 minutes installation time). No performance loss. Fully tested. Repairable. STC FAA-PMA approved (minor alteration, no form 337 required). Kit contains: PROP GUARD boot for a two or three bladed propeller, adhesion accelerator, placard, lint-free cotton cloth, complete installation instructions and a copy of the STC.

CATTO CARBON FIBER SPINNERS

Carbon fiber spinners for experimental aircraft.

The spinner kits include:

- Required hardware
- Unfinished spinner dome
- Both forward/rear bulkheads.

Catto installs the self-centering forward bulkheads prior to shipment to ensure a high quality centered fit that allows the spinner to spin true about the propeller's central axis.

The uncut spinners are available in various diameters.

PROP GUARD SEAM ROLLER TOOL

This rubber coated roller makes working air bubbles out during installation easier than using the spatula included with the PROP GUARD kit. The rubber conforms to the shape of the propeller, and the rolling action allows you to press harder to eliminate small air bubbles. It is recommended for customers who may be installing more than one PROP GUARD or those who just want to make the job faster and easier.
