STEINAIR AV125B EYEBALL VENT

These high quality vents have a nylon/delrin bushing encapsulated between the eyeball and the flange to protect the aluminum! With these vents you simply cut a hole, install the vent and tighten the plenum or retaining nut behind it and hook up the tubing! The vents include everything needed for install. On the small vents you can just directly attach a 2" scat tube to the vent - and on the large vents they have 2" plenums. These will come with a "BAC" part number on them, but that's because they are normally for the cockpits of fighters.

LONESTAR VENTILATION BLOWER KIT

LoneStar Aviation's Ventilation Blower was designed for AIR circulation, ventilation and cooling for the pilot, co-pilot and or passengers. Aircraft with large Plexiglas canopies are especially susceptible to heat generation from the sun during taxi, ramp time as well as low altitude flying.

Pilot or passenger can adjust the AIRFLOW with the potentiometer through a panel mounted eye-ball vent. Additional benefits include defrosting the windshield, AIRFLOW for heat circulation, air-conditioning and or cooling an electronics bay equipment.
