

# FLIGHTLINE RADIOS – TRANSPONDERS

## FLIGHTLINE 760A COM PANEL MOUNT

The FL-760A is extremely small and one of the lightest radios in the industry at just under 1 lb in weight (replaces the FL-760). It provides a frequency range of 118 to 137 MHz with a 5 watt transmitter and 11 - 33 volt power supply. The built-in 2-place VOX intercom is sensitive and perfect for small aircraft cockpits. Users can switch between frequencies with the "flip/flop" option or use scan mode to sift through

32 programmable frequencies; additionally, there is a single button relegated to the 121.50 emergency frequency only. The FL-760A now offers updates to the original: Push-to-Talk (PTT) feature and audio inputs are separate for pilot and co-pilot. Also, intercom, VOX, volume and mic gain adjustments are now conveniently programmable from the front panel. This transceiver is ideal for noisy cockpits providing very clear reception, minimal squelch, and clear output.

Features: • Built-in 2-place VOX intercom • Easily select channels via the 32 programmable memory channel call-up, emergency button, or scan function • Not plug compatible with certain features (power and ground are plug compatible) • Separate PTT and audio inputs for pilot and co-pilot • Intercom, VOX, volume and mic gain adjustments are programmable from front panel • Less than 1 lb in weight • Backlit display for easy reading • Pilot can select the receive notification LED color via the front panel.

 Sandia STX 165 with Custom Harness.....P/N 11-14021 .....**\$1,762.00**

## GARRECHT TRANSPONDERS

VT01  
UltraCompact

The Garrecht Transponder VT-01 is a flexible and modular system concept, in a compact size (57mm) with a very low current and integral alticoder. Available as Class-1 (125 Watt) or Class-2 (71 Watt) System. Specifications: Certification i.a.w: ETSO-2C112a, ED-73B

•Min. RF Output power @Antenne: Class 1: 125 Watt Class 2:71 Watt • Integral alticoder: Yes • Weight control unit: 0,21 kg. •Weight main unit: 0,61 kg •Supply voltage: 9-32 V DC • Power consumption (operation) @ 13,8 V (1200 Mode A/C or 50 Mode-S replies): Class 1: 0,24 A Class 2:0,22 A • Power consumption (on Ground) @ 13,8V (Squitter active): Class 1: 0,17 A Class 2: 0,16 A

Transponder Class 1 .....P/N 11-04529 .....**\$2,927.00**  
 Transponder Class 2.....P/N 11-04530 .....**\$2,647.00**  
 Transponder UltraCompact Class 1 .....P/N 11-05869 .....**\$2,420.00**  
 Transponder UltraCompact Class 1 .....P/N 11-05870 .....**\$2,195.00**
