PILOT & COPILOT SEAT HEIGHT PLACEMENT TOOL

This tool is a must have for any pilot and/or Flight School. Here are a few questions to ask yourself that will help explain why a pilot should use this Seat Height Placement Tool before every flight. This cockpit tool gives the pilot the advantage of consistency in their seat height placement in any airplane they fly. Industry wide, landing accidents have been on the rise. A majority of these can be attributed to improper seat height adjustment and sight picture. The Eye Aligner takes the guesswork out of where to adjust your seat, as well as where the proper Eyleine should be. As an aviator, you know all too well that there are flights where your landings are spot on, and flights where your landings are well.....let's just say not anything to brag about.

Through research, pilot surveys, and over 45 years of instruction, the Eye Aligner manufacturer has come to the conclusion that improper seat height adjustment and sight picture is the main contributing factor to this inconsistency. Made in the U.S.A.P/N 13-19015..... **\$89.95**
