Legendary **Craftsmanship**

As the world leader in Aerospace Ignition and Power Systems, Champion Aerospace takes pride in delivering the highest quality components for your aircraft engine. Every spark plug you install was hand built by skilled craftsmen in our world class Liberty, South Carolina manufacturing facility.
Get The 'RED' Out

With Weldon’s Single & Two-Speed 18000 Series
Replacements For The Old Style Dukes ‘RED’ Pumps.

- WELDON has created an innovative Advanced Technology 2-speed pump design with precise, electronically-controlled operation for improved performance, efficiency, and reliability. Two speed models have already been selected by numerous aircraft OEM’s for new production installation.

- WELDON’s 2-speed pumps are FAA/PMA Approved for virtually all the General Aviation aircraft requiring a two speed pump including Cirrus, Diamond, Beechcraft, Cessna, Mooney, and others.

- UNMATCHED QUALITY and EXPERIENCE you can count on... Over 75 years supplying fuel pumps for General Aviation.

- At WELDON... We have your pump!

Find the exact WELDON pump part number for your airplane at WeldonPumps.com

PERFECT HAS ARRIVED.

Whether you’re building in a hangar or a two-car garage, letting just anybody help with the project isn’t going to happen. Recruiting that trusted friend is as important as finding the perfect parts — ready to work and chock-full of experience with the same attention to detail. When you choose Plane-Power, you’ve enlisted the best. Every alternator, mount and piece of hardware is engineered by aviators for aviators. With the broadest selection for experimental aircraft available and over 7,000 kits delivered, we have history of providing reliable power for the most discriminating builder. Of course, numbers alone won’t get you off the ground. The perfect alternator will.

Behind Every Great Brand Is a Proven Pedigree.

The products mechanics and pilots rely on everyday are a result of Hartzell Engine Technologies and its continuous passion for advancing aviation performance. Each brand delivers premium products, service and support. It’s why we are flying on nearly every piston aircraft, today. When you need a trusted solution, choose a name with a lineage of pure performance. It’s in our family DNA.

tempestaero.com | 336-449-5054

TEMPEST AERO
RAPCO Inc. manufactures high quality FAA-PMA approved products that are offered at a substantial savings over the original parts manufacturers. The products are engineered to provide a long service life and are produced using the latest manufacturing technology and materials. RAPCO backs its products with a best in industry warranty.

Toll Free Order Line: 877-477-7823
www.aircraftspruce.com
Why is Tempest® able to do what others can’t? Because we engineer from the inside out. Tempest believes there are few product designs or components that can’t be improved upon. Acting on that belief, our innovations are changing industry expectations. Tempest leads modern aviation spark plug design with our fired-in suppressor resistor—others have since followed. Tempest spark plugs have a superior bright nickel finish and high alumina ceramic insulators with “Clean Collar” tips; these features result in longer service life and optimal performance. Forward-thinking differences like these set us apart and prove what others now know—Tempest is engineered to lead.

www.tempestaero.com • 800.822.3200

Engineered to Make Life Easier

How does Tempest® recommend getting an oil filter unstuck? Easy. By introducing the industry’s first “non-sticking” easy spin-off oil filter. Engineered from the "base" up, our new SPIN-EZ™ oil filters are the only filters whose base seals are applied with a proprietary baked-on lubricant. This unique compound assures a dry rubber-to-metal interface when the filter is tightened, and stays in place when the filter is removed. (A few more ft-lbs of torque and the filter easily spins off.) No more oil-soaked rags. No more stabbed cans. No more filter wrenches or special tools. Life is easier now that Tempest SPIN-EZ oil filters are on the market. The only thing stuck is the competition.

**WHICH MICHELIN® TIRE IS RIGHT FOR YOUR AIRCRAFT?**

**NEW! MICHELIN® PILOT® HIGH PERFORMANCE BIAS TIRE**
The all-new MICHELIN PILOT high performance bias tire is designed to be the best tire money can buy for propeller driven aircraft. It offers highly-durable rubber compounds and up to 21% deeper skid depth than a leading competitor’s tires* to help provide more landings. It also includes Aramid belts for exceptional strength and durability, and many other state-of-the-art features.

**MICHELIN AIR® BIAS TIRE**
The MICHELIN AIR bias tire offers outstanding value, delivering MICHELIN quality at an excellent price. It is designed for a long tire life and includes many advanced features like ozone protection, outstanding stability, exceptional balance and more.

**MICHELIN AIR X® RADIAL TIRE**
Michelin created the first aircraft radial tire and today, our MICHELIN AIR X radial tire continues to lead the way. The strong yet flexible casing design is engineered to help you achieve more landings, while its lighter weight design (compared to bias tires) can result in measurable fuel savings. Michelin’s exclusive NZG technology also helps provide extra resistance to FOD damage.

*a based on actual sidewall indications for skid depth of 15.00 x 6-6 6 ply tire size (required by FAA regulations) comparing a MICHELIN Pilot bias tire and a Goodyear Flight Custom III bias tire. Comparison made in May, 2018. | Copyright © 2018 Michelin North America, Inc. All rights reserved. The Michelin Man is a registered trademark owned by Michelin North America, Inc.

has mastered the single rotor brake disc and is now manufacturing stack brakes for larger aircraft, including the PC-12.

**Why Superflite?**

- For over 70 years Superflite has been helping aircraft enthusiasts everywhere build and cover their show-worthy aircraft.

- Superflite manufactures its own FAA-approved fabric and tapes (including pre-shrunk) — both of which are approved for use with any coating system.

- The System 7 urethane primer and topcoat is top of the line — it easy to apply, easy to repair, and looks great with minimal effort.

The Digital Duo!
THE PERFECT MATCH!

Both the RCA2610 and the new RCA1510 are designed as FAA Certified, direct replacements for your mechanical gyro instruments. They are totally self-contained and fit in your standard panel cut-outs. With no moving parts to wear out, the RCA2610 and the RCA1510 will give many years of dependable service.

The RCA1510 is our latest addition to the RC Allen digital lineup. It combines data from its own internal magnetometer and GPS receiver for an accurate heading reading. This eliminates the need to “cage” or “zero” the instrument.
