

MECHANICS DOLLIES – STEP STOOLS

BONE MECHANICS CREEPER

The Bone™ features a uniquely shaped body which cradles the user between the wheels only an inch or so above the ground. The big, easy rolling wheels are positioned outboard to provide a strong, stable working platform that can't tip or flip the user. The rib-reinforced body is molded of a state-of-the-art, engineering grade co-polymer that resists the effects of common solvents, so cleaning is quick and easy at the end of the job. The smooth, comfortable one-piece design has no cracks, corners or other pinch points, and the outboard wheel pods prevent tipping and flipping. The Bone™ body is a patented design which allows the use of large diameter wheels with specially formulated tires that roll easily over all sorts of obstacles, including rough floors, drop cords and air lines, loose parts and even tools and floor grates. The wheels are fastened to the creeper body with four 5/16" diameter through bolts so they can't pull tear out or break off in any common use situation. One of the most important features of the Bone™ is its wheels. Ordinary creeper wheels are a conventional creeper's weakest point. They're too small, so they get hung up or stopped by even the tiniest obstacles, and they have a real knack for tearing out or breaking off at the worst moment. To add insult to injury, the replacement wheels can cost almost as much as a new creeperP/N 13-12331\$167.00

TAIL BONE ROUGH RIDER MECHANICS SEAT

The Tail Bone Rough Rider is a totally new approach to creeper seats, designed from scratch to be easier to use, more comfortable, more durable and a better value than any other mechanic's stool on the market! The base is a uniquely designed tripod, so it's a naturally stable working platform even on uneven floors and surfaces. And because it turns with the user, the legs always stay out of the way and let you tuck your feet under you for comfort or convenience. The tripod design also means fewer wheels to have to roll over obstacles! The Tail Bone Rough Rider uses the casters from the Bone Rough Rider Creeper, which are 5 3/8" diameter and 1 3/8" wide, perfect for using outdoors in less than perfect circumstances. It also has an extra inch of ground clearance over the standard Tail Bone! The bucket seat works just like the ones in high performance vehicles, it lets you use your natural body movements and trunk strength to position yourself and the stool exactly where you can do the job at hand comfortably and easily. Work without fear! The Tail Bone just rolls over obstacles that trip and tip ordinary little wheel stools. P/N 13-12330\$197.85

RED VIPER AIRPLANE POSITIONER

Own a small airplane? Having trouble positioning it around in your hangar, garage, etc.? Try RED VIPER Positioners™ they really work! Will hold up to 6000 lbs on a 3 tire airplane. Extremely LOW to the ground (only 1/2 inches ground to dolly) so wheel assembly clearance & tire fenders are never an issue. The side panels are only 3 1/2 inches height. Supports tire thicknesses up to 9 inch & wheel diameter up to 26 inches. Just roll your airplane onto dollies & glide 360 degrees effortlesslyP/N 13-17910\$215.00

AEROCREEPER - ADJUSTABLE CREEPER

Caster options include:

- Standard 3" x 13/16" Hard Rubber
- recommended for most uses on smooth cement floors
- 120 lb dynamic load per caster
- keeps the creeper low for low working positions
- smooth operation
- Heavy Duty polyurethane casters
- More resistant to embedding metal chips & rivets
- 250 lb dynamic load per caster
- 1-3/16" wide tread helps rolling on rough surfaces
- Available in 3 diameters

- 3" - Usually the best choice - keeps creeper low for low work
- 4" - better for rolling on rough surfaces but raises creeper 1-5/8" so it's not as good for low work
- 5" - better for rolling on rough surfaces but raises creeper 2-5/8" so it's not as good for low work
- Locking Casters
- Prevents rolling
- Installed on front two casters

Description	Part No.	Price
Aerocreeper - Standard - 3" Hard Rubber Casters	13-21329	\$445.00
Aerocreeper - Heavy Duty - 3" TPU Casters	13-21330	\$480.00
Aerocreeper - Heavy Duty - 4" TPU Casters	13-21331	\$485.00
Aerocreeper - Standard - 3" Front Locking Casters	13-21333	\$498.00
Aerocreeper - Heavy Duty - 3" Front Locking Casters	13-21334	\$495.00
Aerocreeper - Heavy Duty - 4" Front Locking Casters	13-21335	\$499.00

SHURE-STEP® II

The Shure-Step II is a 10 inch high step stool that will not tip or slip during use for aircraft maintenance. This step stool is rated for 500 pounds yet only weighs 10 pounds. Rubber pads on bottom prevent the step from scratching the paint on an aircraft.

Features: • 6 large rubber pads on bottom • Very rough top surface to keep mechanics safe • Ice cleats keep the step from sliding during icy winter conditions • The Shure-Step II is a stackable step stool • Weight: 10 pounds

HANGARBOT DOOR CONTROLLER

Enjoy the convenience of opening and closing your hangar door from the cockpit with the HangarBot Door Controller! Our premiere door controller system is custom made to the specifications of your hangar door. Compatible with nearly all electric and hydraulic Industrial doors with both momentary and continuous hold models as well, this device provides control and connectivity to your door from anywhere in the world. Tailored to your specific hangar door opening and closing it is as easy as a one-tap or continuous hold feature in our

proprietary mobile application.

Note: This product is NOT compatible with manual latch hangar door.
Note: Your Door Controller is as unique as you are, and will need additional information in order to fulfill this order.

Specifications: • Battery Life: Internal rechargeable battery MicroUSB Cable included (~6 month battery life) • Mounting: Industrial Velcro • Shipping Dimensions: (L x W x H) 6.625" x 2.375" x 1.625" • Shipping Weight: 0.5 lbs.....P/N 11-18344\$225.00
