

APS BRAKE LININGS

APS BlackSteel offers semi-metallic (organic) and metallic linings for your specific application. The semi-metallic linings are impregnated with Kevlar® fibers for optimum performance.

APS metallic linings are constructed from an innovative design and from more durable materials than other brands so you get longer wear and superior stopping power for greater safety.

SEE OUR WEBSITE FOR AIRCRAFT APPLICATION CHART!

FULL LOTUS FLOATS

Full-Lotus Floats are the most versatile and rugged aircraft floats on the market today. First introduced in 1985, the unique design uses multiple inflatable bladders inside a vinyl outer shell and a protective polycarbonate bottom. The result is a comprehensive float system that can be beached on rocky shores without worry and that can bump most submerged objects at taxiing speed without damage. Many aircraft owners regularly use their Full-Lotus floats on ice and snow - just like skis. There is no other float system like it in the world! Full-Lotus Floats are now made by Aircraft Floats Manufacturing (AFM) and are available in six different sizes for a full range of aircraft including Light Sport, Amateur-built, Experimental and Ultralight aircraft. Full-Lotus floats work great on fixed wing aircraft, but also on gyro-copters and trikes... New AMPHIBIOUS Full-Lotus floats with integrated main wheels were introduced by AFM in 2014 and are now available in a number of different sizes. Aircraft Floats Mfg. also offers generic RIGGING KITS for all sizes of Full-Lotus floats. These kits include streamlined spreader bars and struts, top-of-the-line machined aluminum fittings and aircraft-grade hardware.

STRAIGHT FLOATS FL1650

Specifications: • Buoyancy: 1650 lbs/float (750 kg/float) • Length: 15' 1-1/2" (4610mm) • Step Position: 97" (2464mm) from front • Step Height: 3.5" (89mm) • Float Weight (without tubes): 75 lbs (34.09kg) each • No. of Stiffener Tubes per Float: 3 • Stiffener Tube Length: 2 x 176" (2 x 4470mm), 1 x 70" (1-1778mm) • Stiffener Tube Weight per Float: 11 lbs (5 kgs) • Compartments: 4 front and 4 rearP/N 05-03304
