MCFARLANE CESSNA NOSE STRUT SEAL KIT

Australian Nose Strut Seal Kit Solves the Problem! FAA-PMA. Features a doublee edge ("X" style) seal that will not twist and leak. It solves the continuous leak and re-service problems with the Cessna nose strut, allowing you to go years without servicing.
 • FAA-PMA direct replacement for Cessna P/N SK172-1F • Also includes AN901-5A gasket • Improved lock rings are made of 304 stainless steel for better corrosion resistanceP/N 05-03602**\$71.75**
 Quad Ring 1100P/N 05-22285**\$29.95**

GRANVILLE'S STRUT SEAL

Landing gear strut packing seals shrink due to fluctuating weather conditions and age. This specially engineered hydraulic chemical additive leaves a protective coating on the strut shaft and allows the seal to expand to its normal size. It will stop strut leaks and is an excellent lubricant and corrosion preventative. Application is fast and easy - any owner or pilot can do the job in minutes. FAA approved.
 Single-Strut KitP/N 06-13300**\$42.70**
