

BATTERIES – BATTERY CHARGERS

EARTH X LITHIUM BATTERIES

Note: Not FAA Approved. Intended for use in experimental aircraft only. EarthX Lithium batteries are designed to be a replacement of a standard 12 volt lead-acid battery. The batteries will work with any vehicle charging system and "modern" lead-acid battery chargers, thanks to the built-in battery management system. And the batteries are an exceptional value given the fact they last years longer than a lead-acid battery.
