ANDAIR FUEL PUMP KITS

These systems have a PX375-TC Fuel Boost Pump either for 3/8" or 1/2" fuel lines and GAS375 Gascolator. Some kits may have two Gascolators: one with the standard flow direction (Right to Left) and one with the reverse flow (Left to Right), mounted in the wing roots.

Fitting a Gascolators in each wing root, rather than one in the centre console, allows for easier maintenance, and keeps any fuel odours from spills that may occur during maintenance outside of the cabin.

Filtering fuel for the Fuel Boost Pump is a must, and the Gascolators perform dual roles of trapping any water and filtering the fuel for the Fuel Pump.
