## TEMPEST AA473 OIL DRAIN TOOL

Tired of messy oil filter changes? Tempest oil drain tool with a twist of the knob drills a hole in the filter and allows the oil to drain out of the filter into your container. No mess, easy to do and inexpensive. Tempest improved the popular AA473 Oil Filter Drain Tool by redesigning the swivel fitting to a smaller, more compact design. The new fitting also allows for easier use of the tool because of its "true" swivel characteristics. If you want to upgrade your previously purchased AA473 Oil Filter

Drain Tool you can purchase the fitting individually.

**Can only be used on Tempest Oil Filters.**

## TEMPEST AA473 OIL DRAIN TOOL

The Strain-O-Matic was created to take the hassle and mess out of draining oil filters, while simultaneously straining the engine oil for contaminants. The device hangs over the edge of a 5-gallon bucket. An included, Premium Silicone Tube connects to the engine oil drain valve. A removable 2" stainless-steel strainer is in the base of

the unit. When an engine is making metal, it is a little-known fact that the oil filter will only contain a small fraction of this metal. Most of the metal fragments lie dormant at the bottom of the oil pan. As oil is drained from the engine, any metal fragments are washed out as the oil is drained. This metal is removed by the strainer. Once the oil has finished draining from both the filter and the engine, the strainer is removed and inspected.

## TEMPEST AA474 OIL FILTER WRENCH EXTENSION

Some aircraft applications create an environment that does not allow adequate clearance to get a torque wrench or even an open-end wrench around the install nut on oil filters. Even though Tempest has recently introduced the Dash II filter, which is the shortest oil filter on the market, the clearance is still not enough on some

applications, such as Beech Barons and Bonanzas. To eliminate this problem Tempest produces the AA474 oil filter wrench extension.

**Features:** Chrome-plated steel provides a high quality tool. Easy to use torque conversation label on back of tool.

## AIRWOLF AFC-470 OIL CAN CUTTER

Every A&P knows the importance of cutting every single oil filter open after an oil change. The problem up to now was oil filters were difficult to open and the tools to open them were expensive. This is no longer the case with the Airwolf AFC-470 oil filter cutter. The AFC-470 is the easiest and quickest way to determine

the current health of your engine. The Airwolf AFC-470 oil filter cutter is constructed out of a solid 6" billet of super strong 6061-T6 aluminum, hard anodized to resist scratches and wear. Stainless steel rollers allow the oil filter to spin effortlessly during cutting. And finally, our specially designed razor sharp cutter wheel hardened to 60 Rockwell, will make quick work of opening any oil filter. This filter is designed to last a lifetime. Fits new style oil filters. Champion/Tempest/Kelly Filters from 3.75" - 3.00" Dia

## HAND CRANK OIL FILTER CUTTING TOOL

This tool was designed to eliminate much of the mess that occurs with small handheld oil filter cutting tools. Very simple to operate, it is excellent for individual aircraft owners as well as FBO's and maintenance shops where a lot of filters need to be cut. Simply clamp in a vise, screw on the filter, turn the cutter into the filter and hand crank to open the filter. The rugged construction enables this tool to operate trouble free for years.

## HV-FLEX OIL FILTER FLUID EXTRACTOR TOOLS

Accomplish oil filter extraction task without the mess with quality, US-patented HV-FLEX TOOLS. Our products are guaranteed to help speed up the process. Based in Gilford, New Hampshire, our company offers our products

nationwide and beyond. Tidy. Efficient. Eco-Friendly. Oily and messy situations are common when replacing spin-off filters. Luckily, the HV-FLEX TOOLS were created to solve this problem, helping save time and cost from clean-ups. Our products extract the oil accumulated within spin-off oil filters during routine replacement. They are used on oil, diesel fuel, and hydraulic fluid filters found in automotive, marine, aviation industries, and etc. The HV-FLEX TOOLS offer a quick and clean oil filter extraction process. In addition to all of this, the oil fluids collected from the vacuum pump reservoirs can be recycled, reducing oil waste and negative environmental impacts.
