

# TOWBARS – TUGS

## THE TAIL-DRAGGER DRAGGER

This manual tow bar has heavy-duty solid rubber 8-inch wide tread wheels and will move most tail-draggers up to 2,000 lbs. and tail wheel tires up to 10 inches in diameter. Options Available: 3rd Wheel for heavier ships, and RV tail wheel lift pin.

### Features:

- Patented Design • No Winches • No Hydraulics • No Metal To Metal Contact • No Adapters Required • Superior Traction • 5 Second Loading & Unloading • Will fit Almost Any Aircraft • Tail Wheel Stays In Trailing Position • Lifting Pins Grip and Lift Tail Wheel • Maneuver In Any Direction • Operator Has Good View Of Wingtips

### Compatibility: Important Compatibility Requirements:

- Your aircraft must have 9" of clearance from the ground to the bottom of the tail • The tail wheel cannot be situated a significant distance from the tail • If you have an RV or Waco, especially measure and confirm these requirements as many airframes will not be compatible.

## BOGERT UNIVERSAL BIG BOGI TOWBAR

The 04M-BBU is unique because it can attach to virtually any aircraft. It has interchangeable "Feet" that can be matched to any aircraft. Each of the "Feet" typically adapts to several models or series of aircraft and several sizes can be carried right on the tow bar. This is perfect for FBO's that deal with a variety of aircraft or aircraft owners that have more than one plane or shared hangars. "Interchangeable feet sold separately".

## SABRE TUG TYPE TOWBAR

### Why The Sabre Line of Tug Type Towbars?

The Sabre line of tug type aircraft towbars incorporates a unique design that allows the operator to connect to the aircraft as a one man operation. This is done using Derringer's slide and latch design. This cutting-edge design was so unique it was awarded a US patent for its revolutionary slide

and latch operation. The Sabre tug type tow bar comes configured to connect to a large range of aircraft and offers a large range of attach fitting to accommodate virtually any aircraft nose gear tow points.

Features: • Favorite among FBOs for years • Fit a large variety of aircraft • Quick change Specialty Aircraft Nose Gear Adaptors • Rated up to 10,000 lbs • Incorporates Derringer's slide and latch design • Available with a tow ring, ball hitch mount or clevis style hook up. Towbar Operation - To use the operator positions the tug to a relatively close location to the aircraft, then slides the telescoping hitch to the tow vehicle's attach point and then connects. From there the operator moves the tow vehicle toward the aircraft and the latch mechanism connects making hookup a breeze.

## NOSE WHEEL DRAGGER DRAGGER

The Nose-Dragger Dragger features a swing gate front roller (for easy loading), 10 ball bearing rollers (which push and guide the nose wheel), and does not require the use of adapters, winches, or hydraulics. Effortless ground handling is accomplished by its lightweight design and slow walking speed. The Nose-Dragger Dragger accepts nose wheels up to 600 x 6 (with or without wheel fairings), and no metal-to-metal or metal-to-fiber-glass contact. Available in gas or electric power models. The 12V electric powered Nose-Dragger

Dragger will accept aircraft up to 3,000 lbs. The Nose-Dragger Dragger Gas powered model accepts aircraft up to 6,000 lbs.
