MARSH BROTHERS STC KING AIR FLAP ROLLER KIT

Marsh Brothers Aviation's Flap Roller upgrade kit is a proactive solution that eliminates flap roller bearing seizure and minimizes wear of the aircraft flap tracks. By eliminating the roller greasing requirement via use of a self-

lubricating bearing system, the rollers are maintenance-free by design thereby increasing the mean time between maintenance while reducing overall costs associated with replacement and repair of flap system components. Push buttons only, with new screws. Features: • Reduces unscheduled maintenance downtime and expense. • Eliminate the risks associated with bearing seizure and costs associated with flap track replacement. • No hot/cold grease implications on bearing operation. Bearing is self-lubricating, requires no grease. • Cartridge-type bearing design is highly resistant to incursion by dust/debris. • Easy to install: Flange washers come preinstalled on the rollers, providing a drop-in solution that reduces the part count and eliminates the need to stack parts during assembly.P/N 05-32423

BEECH STORM WINDOW HINGE/LATCH KIT

Every Bonanza or Baron pilot will appreciate the quality workmanship in every one of these storm window hinge/latch kits. Professional construction means they work smoothly, and they fit standard factory window holes with no modifications. Complete hinge/latch kit

AEROSTAR SEAT ROLLER - ATGF REPAIR BUSHINGS

This kit includes the self-lubricating polymer alloy bushings. The stainless steel sleeves are not included in this kit. Please refer to M-01-1002 for the Aerostar Seat Roller Repair Sleeves Kit.

Seats in the Aerostar are designed to roll on four aluminum rollers located at each seat corner. The rollers are made from a relatively soft aluminum running against steel sleeves, and are not supposed to be lubricated in accordance with the aircraft maintenance requirements. If the wear is uneven across the four rollers, the worn roller will not be able to support the seat which can cause the seat to bind making it difficult to move forward and backward.

P/N 05-27091

AEROSTAR SEAT ROLLER - CRES REPAIR SLEEVE

This kit includes the stainless steel sleeves. The self-lubricating polymer alloy bushings are not included in this kit. Please refer to M-01-1001 for the Aerostar Seat Roller Repair Bushing Kit.

Seats in the Aerostar are designed to roll on four aluminum rollers located at each seat corner. The rollers are made from a relatively soft aluminum running against steel sleeves, and are not supposed to be lubricated in accordance with the aircraft maintenance requirements. If the wear is uneven across the four rollers, the worn roller will not be able to support the seat which can cause the seat to bind making it difficult to move forward and backwardP/N 05-27092

KING AIR NLG DOOR HINGE AEROTOUGH® BUSHING KIT

This kit covers the nose gear door hinge bushings for the King Air.

Avoid unnecessary and costly repairs by installing AeroTough® GF polymer bushings. This preventative maintenance solution will ensure that you will never have the complications with seized bushings that traditional metal bushings can exhibit. Lifetime lubricated AeroTough® bushings prevent problems:

BEECHCRAFT MAIN GEAR BOLT

This is a replacement for discontinued Main Gear Bolt part number CA101-810089-1. The new part number is CA101-810089-1A. This part has been tested and is superior in tensile strength and fatigue and crack resistance. Eligible for Beechcraft 1900 series aircraft, this is a life limited part that meets all requirements for the full 5 year/10,000 cycle life. The part number and serial number are engraved on the bolt head.
