

Aircraft Spruce Panel Builder Website User Help

To insure this site works correctly, make sure your computer supports Java & allows pop-ups.

This site is can be broken down into five sections.

- Aircraft Information
 - Components Selector
 - Order List
 - Panel Notes
 - Panel Checklist
-

Section 1: Aircraft Information

A screenshot of the "AIRCRAFT INFORMATION" form. The form has a title bar at the top. Below the title bar, there is a dropdown menu for "Panel ID" with "Panel: 1" selected. Below this are two columns of input fields: "Aircraft Make:", "Model:", and "Tail #" on the left; and "Aircraft Voltage:", "Panel Type:", and "Serial #" on the right. At the bottom of the form, there are four buttons: "UPDATE PANEL", "NEW PANEL", "COPY TO NEW", and "DELETE PANEL".

Here you can save your aircraft info under a Panel ID. You can create as many Panel IDs as you wish. Simply type your Aircraft Make, Model, Tail #, Aircraft Voltage, Panel Type, and Serial # then click on the Update Panel button like the one shown below to save your information.

Always remember to click **UPDATE PANEL** to save your information

The screenshot shows a web form titled "AIRCRAFT INFORMATION". It contains several input fields: "Panel ID" is a dropdown menu showing "Panel: 1"; "Aircraft Make" is a text box with "COZY"; "Aircraft Voltage" is a text box with "12 VDC"; "Model" is a text box with "MARK IV"; "Panel Type" is a text box with "CONGO"; "Tail #" is a text box with "N431AS"; and "Serial #" is an empty text box. At the bottom of the form are four buttons: "UPDATE PANEL" (highlighted in orange), "NEW PANEL" (blue), "COPY TO NEW" (orange), and "DELETE PANEL" (pink).

Panel: 1

As you are building your panel you may want to consider different packages of avionics & instruments for your panel. With the ability to build multiple panels you can create a VFR & IFR panel as shown below.

To create a new panel click the **NEW PANEL** button

The screenshot shows the same "AIRCRAFT INFORMATION" form, but with "Panel ID" set to "Panel: 2". The "Aircraft Make" field now contains "COZY (VFR)". All other fields ("Aircraft Voltage", "Model", "Panel Type", "Tail #", "Serial #") and the buttons at the bottom remain the same as in the previous screenshot.

Panel: 2 VFR Panel

After you have completed your VFR panel simply click on the **COPY TO NEW** button to create a new panel with the previous panel information.

Panel: 3 IFR Panel

This way you can get a quote for both panels to see what best fits your budget.

Here is a simple explanation for each button you will see in the Aircraft Information section.

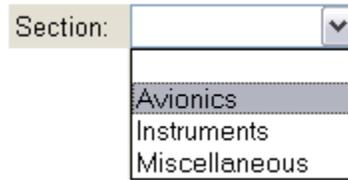

-  Saves the current information on the web page
-  Creates a new panel ID
-  Creates a new panel with the previous panel's information copied to it
-  Deletes current panel (Warning: cannot retrieve panel ID once deleted)

Section 2: Component Selector

The Component Selector allows you to choose numerous avionics, instruments, and other components needed to build a panel by use of drop down menus.

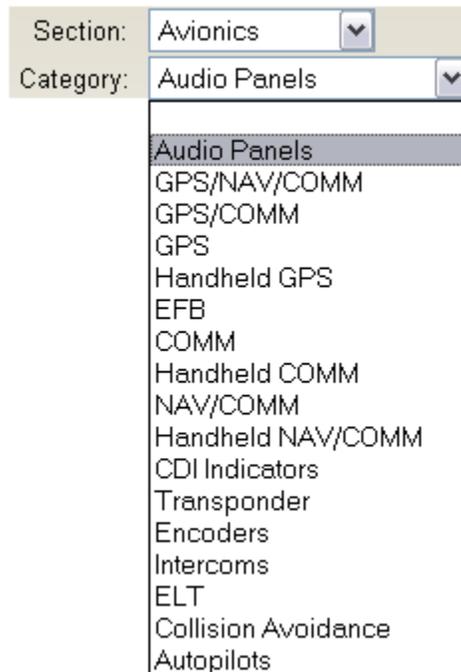

Here is a simple explanation for each drop down menu.

Section – The top level, breaking down avionics & instruments etc.

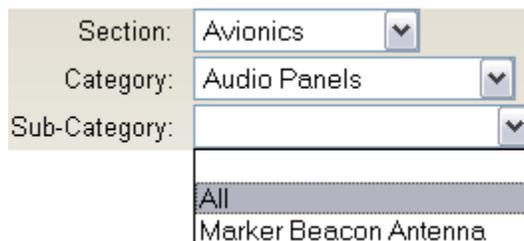

A screenshot of a web form showing a dropdown menu labeled 'Section:'. The menu is open, displaying three options: 'Avionics' (highlighted), 'Instruments', and 'Miscellaneous'.

Category – Shows all equipment types within the selected section.

A screenshot of a web form showing two dropdown menus. The first is labeled 'Section:' and is set to 'Avionics'. The second is labeled 'Category:' and is set to 'Audio Panels'. Below the 'Category:' dropdown is a list of sub-categories: 'Audio Panels' (highlighted), 'GPS/NAV/COMM', 'GPS/COMM', 'GPS', 'Handheld GPS', 'EFB', 'COMM', 'Handheld COMM', 'NAV/COMM', 'Handheld NAV/COMM', 'CDI Indicators', 'Transponder', 'Encoders', 'Intercoms', 'ELT', 'Collision Avoidance', and 'Autopilots'.

Sub-Category – Allows you to see all the units within the selected category as well as all the components that need to be used in conjunction with unit type selected (like antennas & coaxial cable)

A screenshot of a web form showing three dropdown menus. The first is labeled 'Section:' and is set to 'Avionics'. The second is labeled 'Category:' and is set to 'Audio Panels'. The third is labeled 'Sub-Category:' and is set to 'All'. Below the 'Sub-Category:' dropdown is a list of sub-categories: 'All' (highlighted) and 'Marker Beacon Antenna'.

Page Selector – Displays all the Aircraft Spruce and Specialty web site pages for units within the sub-category by either make & model or by the manufacturer.

Section: Avionics ▼
 Category: Audio Panels ▼
 Sub-Category: All ▼
 Page Selector: ▼

- All
- Garmin GMA 240
- Garmin GMA 340
- Garmin GMA 347
- Bendix/King KMA 24
- Bendix/King KA 134
- PS Engineering PAC 24
- PS Engineering PMA 4000
- PS Engineering PMA 6000
- PS Engineering PMA 7000B
- PS Engineering PMA 8000B
- PS Engineering PMA 8000B-MP3
- PS Engineering PMA 8000-SR
- PS Engineering PMA 9000EX
- Val AP 100

When you select a unit on the Page Selector, a web page for that unit will automatically come up, showing you information on that unit. At the bottom of each page there is a description, part number, price, and the option to “Add to panel”. If you wish to view a different unit, or go back to the main page, just click the back button on your internet tool bar and use the drop down menus to select a different unit.

Description	Part No.	Price	Buy
GARMIN GMA-240 AUDIO PANEL	11-06619	\$795.00	Add to panel

Clicking on the “Add to panel” link will bring you back to the main site and add that part number to your Order List.

Here is a simple explanation for each button you will see in the Component Selector section.

-  Saves the current information on the web page
-  Creates a printable version of the web page
-  Puts your Order List into the shopping cart so you can purchase online
-  Sends your Order List to Aircraft Spruce to be quoted for your custom panel

Section 3: Order List

Once you have clicked “Add to panel” on a specific product it will add it to your Order List. Here you can see the Quantity, Part#, Description, Price, and Extended Price of each item on your Order List. You can remove individual line items by clicking the remove button on the item you wish to remove and click the Update Panel button.

ORDER LIST

	<input type="text"/>	<input type="text"/>			
	<input type="text"/>	<input type="text"/>			

Here is a simple explanation for each button you will see in the Order List section.

- Saves the current information on the web page
- Resets any information since your last save (Update Panel)
- Removes all parts off you Order List

Always remember to click to save your information

Section 4: Panel Notes

The Panel Notes is simple as it allows you to save notes & ideas for you panel building project.

Section 5: Panel Checklist

The Panel Checklist allows you to keep track of each item you may want to include in your panel. It is similar to the Panel Notes but is in a check list format.

Simply type the description and part number from your Order List on the specific unit and check the box showing you have completed that part or type whatever notes you need such as what products you are considering.

Always remember to click  to save your information
